ABOUT ME

I have been interested in programming since i am 12, i choose this job because it was my childhood dream. I have completed many projects in 10 years as a freelancer. I started my career with C programming language, firstly i wrote small bot programs to online games like Knight Online, Metin2 and i sold them to players, then i continued to my way with learning socket programming and assembly language (8086) after that i started to search OOP and dive into the details of programming with C# and continued to follow the paths a professional software developer should follow. I have done many projects and works during my university years, like machine learning and image processing with Python. Nowadays i am working with PHP (Laravel, Symfony) and Vue.js

PROJECTS

March 2023 — **DataMigrator Laravel Package**

Data Migrator is a PHP/Laravel package that helps you migrate data from one model to another.

https://github.com/oguzhankrcb/DataMigrator

Sep 2022 — **Auto Casting Json Resource Laravel Package**

A package has the ability of automatically casting your JsonResource data using the casting functions you have defined before.

https://github.com/oguzhankrcb/auto-casting-json-resource

Nov 2022 — **Easy-PDF**

I made some implementations for this project.

https://github.com/tarfin-labs/easy-pdf

July 2021 — **GetirAPI Integration**

Getir API library to integrate with our restaurant programs.

https://github.com/oguzhankrcb/GetirAPI

July 2021 — **QR Menu**

A project that helps restaurants migrate their menus to the cloud . Developed with the Laravel framework.

https://nestademenu.mikaleyazilim.com

June 2021 — **Mikale Boss**

The boss management system developed with Laravel, in this project, which I coded in an extremely flexible and modular way using the repository design pattern, business owners can manage their businesses remotely very easily.

https://mikaleyazilim.com/urunler/mikaleboss

May 2021 — **Riot Auto Login**

A project made for a game named 'League Of Legends', program has an ability to login to league of legends game automatically in background.

https://github.com/oguzhankrcb/RiotAutoLogin
